SKILLS

- **Programming Languages:** Java, Advance java
- **Frameworks/Technologies:** Spring, Spring Boot, Hibernate, JSP, Angular
- **Web Development:** HTML, CSS
- **Databases:** MySQL, Oracle
- **Version Control:** Git, GitHub
- **Tools & IDEs:** Eclipse, Visual Studio
- **Concepts:** REST APIs, MVC Architecture, Microservices

WORK EXPERIENCE

Academic Project:
Dyp Tracker (2022-2023):

- Developed "Dyp Tracker" utilizing geofencing technology to enhance the safety of students.
- Implemented features to send text message notifications to parents when students enter or leave college.
- Demonstrated strong software development and geofencing skills, contributing to a safer campus environment.
- **Tools and Language**:- Android studio, Java, Google firebase (database)
- **Role:** Front-End coding

Blog Application (2024):

- Developed a full-stack blogging platform that allows users to create, read, update, and delete blog posts.
- Implemented role-based access, enabling writers to manage their content while readers can only view published posts.
- Designed a responsive and interactive front-end using Angular, while building a robust back-end with Spring Boot and MySQL for data persistence.
- Focused on clean UI/UX, RESTful API development, and secure data handling.
- **Tools & Technologies:** Java, Spring Boot, MySQL, Angular, HTML, CSS, Eclipse
- **Role:** Full Stack Developer (Front-end & Back-end)
